

PLEASE TAKE A PRINTOUT OF THE ASSIGNMENT

CORONA VIRUS WORKSHEET (Class VI)

Name : Class & Sec : Date :

Children you must be aware of spread of Coronavirus all over the world. Lets find, face and fight it out.

BIOLOGY OF VIRUS:-

Virus in Latin means "Poison". All viruses are parasites, they get food and energy from organism in which they live. Though they reproduce (multiply) like living organism, they cannot multiply on their own, they need to be attached to a host organism (another microbe or a plant or an animal) for the same purpose. Many new viruses can be produced in this way in just an hour. Most viruses are even smaller than bacteria. Infectious diseases caused by virus include HIV, Chickenpox, Influenza and measles. Though not all virus are deadly.

Know About Coronavirus.

The name coronavirus comes from the Latin Word 'corona' which means crown. It comes from the crown like ring of bumps on the surface of each virus particle. The family of Coronaviridae comprises of group of 11 viruses, which infects vertebrates. Coronavirus, CoVs causes a range of respiratory, enteric and neurological diseases in humans and in animals.

1) Surf the net and find out.

a) In which decade the coronavirus family was identified first?

Ans. _____
